1-Exploracion-concentrado-2014

1. Cargar librerías

Casi siempre se utiliza la librería tidyverse para análisis de datos en R.

El tidyverse es una colección de paquetes de R diseñados para data science Todos los paquetes comparten la misma filosofía, gramática y estructuras de datos.

Puedes leeer más de tidyverse en su página tidyverse.org

Si no est 'tá instalado Tidyverse:

```
#install.packages("tidyverse")
```

Cargar tidyverse

```
library(tidyverse)
```

```
## -- Attaching packages -----
## v ggplot2 3.2.1
                   v purrr
                           0.3.4
## v tibble 2.1.3
                           0.8.3
                   v dplyr
## v tidyr
          1.1.0
                   v stringr 1.4.0
## v readr
          1.3.1
                   v forcats 0.4.0
## -- Conflicts ----- tidyverse_conflicts()
## x dplyr::filter() masks stats::filter()
## x dplyr::lag()
                 masks stats::lag()
```

2. Lectura de datos a R

Leer datos a una variable con nombre df. df es short para DataFrame, una estructura de datos tabular común en R y otros lenguajes/software de análisis de datos. Esta variable se puede llamar como quieras. Puede ser concentrado_hogar, df, base_datos, etc., df es fácil de escribir y recordar;)

```
df <- read_csv('data/2014/tra_concentrado_2014_concil_2010.csv')
```

```
## Parsed with column specification:
## cols(
##
     .default = col_double(),
##
     folioviv = col_character(),
##
     ubica_geo = col_character(),
##
     ageb = col_character(),
##
     est_dis = col_character(),
     upm = col_character(),
##
##
     educa_jefe = col_character()
## )
## See spec(...) for full column specifications.
```

3. Análisis exploratorio de datos

```
str(df)
## Classes 'spec_tbl_df', 'tbl_df', 'tbl' and 'data.frame': 19479 obs. of 132 variables:
## $ folioviv : chr "0100008302" "0100008303" "0100008304" "0100008305" ...
## $ foliohog : num 1 1 1 1 1 1 1 1 1 ...
```

```
$ ubica_geo : chr
                      "010010000" "010010000" "010010000" "010010000" ...
## $ ageb
                     "000-0" "000-0" "000-0" "000-0" ...
               : chr
## $ tam loc
             : num 1 1 1 1 1 1 1 1 1 1 ...
